

NATURE CRAFT

EARTH MONTH

Happy Earth Month! It's a great time to support the environment through everyday sustainable choices by practicing the principles of Reduce, Reuse, and Recycle. Small actions can make a big difference. Try unplugging electronics when they are not in use, conserving water and electricity, choosing to walk, bike, or carpool when possible, and finding ways to reuse items instead of throwing them away.

Celebrating your community is another meaningful way to honor the Earth. Buying local helps reduce greenhouse gas emissions while supporting your local economy. Nature is part of our community too, and creating habitat for wildlife benefits both people and ecosystems. Native plants support birds and pollinators while also requiring less water, fertilizer, and pesticide use, which helps improve soil health and water quality.

CREATE YOUR OWN EARTH MONTH CRAFT

MATERIALS

Construction paper, tissue paper, glue, scissors

DIRECTIONS

1. Cut a large blue circle
2. Glue small pieces of tissue paper to create land for your Earth
3. Decorate your Earth by adding a face and a heart
4. Accordion-fold strips of construction paper, then glue them to the back of your Earth to make arms and legs
